

2026 Road Tour and Building Review Notes

11 April 2026

The Town Board (Brendan Smith, Loren Schleusener, and Brock Bailey) plus Cody Schaub conducted our annual road tour on Saturday, 11 April from 0800-1230.

Road Issues:

- Putters Ridge: As part of the culvert replacement on Emperor Avenue, we will take down the 3 trees on the corner to ensure good line of sight from Emperor to Elkland Road—Brendan to contact Brennon to work that
- Elan Rd: Wedge turn around on East end
- Elgin: Determine if we can work with the landowner on the South side of the culvert across from Moseley's to see if they'll let us fan that out a bit.
- Elderado: Turn-around needs to be smoothed out a bit
- Elk Road: Who owns the sign that's out of plumb?
- Elliot:
 - Trees on NW corner could use a trim as could the trees on the south side ~100 yds from M
 - Minor ditching on N side @ culvert half way down—2nd culvert to the West
 - Consider seal coating as part of the 5 year plan
- Elixir: Culvert on west end needs addressed. Remove 2nd culvert stuffed in the pipe; possibly extend and add a flared end section
- Elixir/Ellsworth stop signs: Remove flags and flag holders
- Embassy: Patch
- Emmerson: Replace culvert in swampy area in prep for an LRIP project; may need to re-seal the graffiti
- Floral: Patch
- Flint: Patch and consider chip seal for 5 year plan
- House on Flint: Driveway permit and fire #?
- Fire Department: Fix shed wall (2 x sheets of steel [swap with steel on back side if we can't match the color] plus a couple of 2x4's; place more permanent stakes around septic lid
- Flint West of 21: Push logs out of RoW for the area with the campers across from Melissa's place
- Flatiron: Patch on inside corner where it turns North
- Flower: Smooth out turn-around

- Flute/Flame/Flutter: We need to set up some time to brush this out
- Foley: We need to work with the City to see if we can get them to install a dead-end sign at the beginning of the road.
- Foothill:
 - Load of gravel needed in the turn-around
 - Patch at junction of road and private drive
- Forbes: Patch on bridge intersection where there's a bump
 - Consider giving this road to the City
- ARIP Project: Do we need a Road Closed sign at Formica and 21? Brendan to work that
- Espy: Consider wedging the whole road as part of the 5 year plan
- Ermine: 5 year plan addition--Consider wedging whole road; double wedge on the NE corner to get water to flow to the inside of the turn
- Domino: Patch on west side
- Dogwood: Shoulder on the inside turn by SE corner of Utkes property; can the culvert on that corner also be cleaned out?
- English: Remove small tree that's tipped over and protruding into the road
- England N of G: Patch
- Dixie: Patch including over culvert
- Dial/Dewdrop: Patch
- Destiny: Patch
- Ellsworth by Pentecostal Church: Patch
- Charcoal: Patch inside corner on top of the hill
- DelRay: Trim trees at top of hill
- Dexter: Wedge north of Knapp's house
- Deuce: Wedge low/settled spots

Building Issues:

- Main shop:
 - Get at least 2 quotes for metal roof paint/sealer
 - Determine status of N and S walls (remove steel)
 - If they're in good shape, replace both people doors
- Recycle Center Bldg:
 - Replace people door
- Upper Shed
 - Get at least 2 quotes for roof work to fix leaks unless we want to do this internally?

- Is it as simple as sealing/caulking screws/nails?
